

COMP 513 Project

Rolis

Presented by
Olivier Michaud, Akshay Gopalakrishnan
McGill University

December 5th 2023

Project Description

COMP 513 Project

Presented by
Olivier
Michaud,
Akshay
Gopalakrish-
nan
McGill
University

Introduction

Setup

Experiments

Conclusion

Rolis: A software approach to efficiently replicating multi-core transactions

- Proposes a new consensus algorithm to improve throughput.
- Uses multiple threads per leader/follower to process transactions.
- Performs well upon failure recovery using *watermarks* to ensure synchronization when necessary.

Choice of Experiments

COMP 513
Project

Presented by
Olivier
Michaud,
Akshay
Gopalakrish-
nan
McGill
University

Introduction

Setup

Experiments

Conclusion

- Throughput
 - vs Silo - Algorithm is built by modifying Silo.
 - vs Calvin - Existing state-of-the-art.
- Latency
 - On different batch sizes.
 - Measured for 10th, 50th, 95th percentiles.

Chosen Test Environment

COMP 513
Project

University

Introduction

Setup

Experiments

Conclusion

Comparison (right) with original system (left)

- | | |
|--|--|
| ■ Azure | ■ AWS EC2 |
| ■ 32vCPUs (Intel Xeon Platinum 8272CL) | ■ 32vCPUs (Intel Xeon Platinum 8259CL) |
| ■ 128GB RAM | ■ 128GB RAM |
| ■ 16,000Mbps Network | ■ 10,000Mbps Network |
| ■ Ubuntu 18.04 LTS | ■ Ubuntu Server 20.04 LTS |
| ■ Hypervisor: Hyper-V | ■ Hypervisor: KVM |
| ■ Single Socket (assumed) | ■ Shared Instance |

Steps to Run

COMP 513
Project

Presented by
Olivier
Michaud,
Akshay
Gopalakrish-
nan
McGill
University

Introduction

Setup

Experiments

Conclusion

- Virtual Private Cloud
- Security Groups
- Start EC2 instances.
- Setup SSH connections.
- Run install.sh.
- Setup IP addresses (guide given by the paper).
- Run one-click.sh.

Throughput: Rolis vs Silo (YCSB++)

COMP 513
Project

Discuss Observation

COMP 513
Project

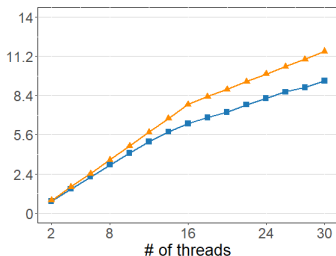

Presented by
Olivier
Michaud,
Akshay
Gopalakrish-
nan
McGill
University

Introduction

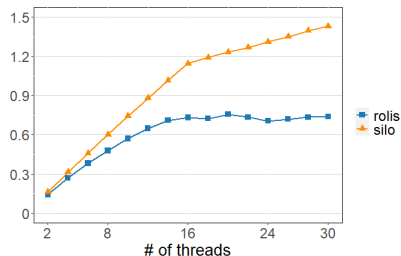

Setup

Experiments

Conclusion

(a) YCSB++

(b) TPC-C

- VM Resource Overcommitment vs Bare Metal Instance.
- CPU sockets.

Throughput: Rolis vs Calvin (YCSB++)

COMP 513
Project

Project

Presented by
Olivier
Michaud,
Akshay
Gopalakrish-
nan
McGill
University

Introduction

Setup

Experiments

Conclusion

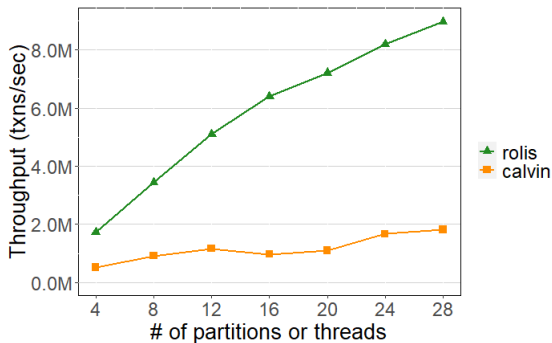

Figure: Observed Throughput of Rolis vs Calvin

- Calvin's thread-implementation vs Rolis.
- CPU Sockets (Calvin experiment needs just one Machine).

Latency: Batch-Size Take 1

COMP 513
Project

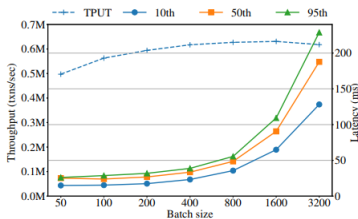

Presented by
Olivier
Michaud,
Akshay

Gopalakrish-
nan
McGill
University

Introduction

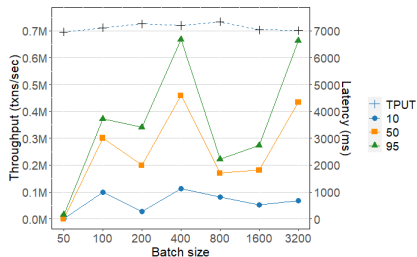

Setup

Experiments

Conclusion

(a) Original (16 threads)

(b) Observed (12 threads)

Discuss Observation

COMP 513
Project

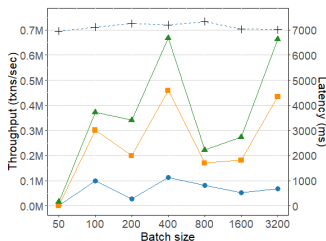

Presented by
Olivier
Michaud,
Akshay
Gopalakrish-
nan
McGill
University

Introduction

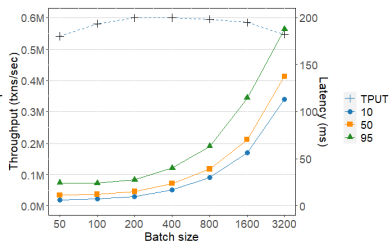

Setup

Experiments

Conclusion

(a) Original (16 threads)

(b) Observed (12 threads)

- Shared Instances - Network Bandwidth.
- Shared Instances - Congestion Control.

Thank you
